# CSI AMERICA 2023

## Catheter interventions in congenital, structural and valvular heart disease and heart failure

### Dear Colleagues,

It is with great pleasure to formally invite you to join CSI America 2023 - the 5th edition of CSI in the USA. We are excited to announce our collaboration with **AdventHealth Nicholson Center**, a medical research and training facility in Orlando, Florida.

**Heart dissection workshops** for practical tips on device implantation are always an educational highlight at CSI conferences. At CSI America 2023, we will take this a step further by adding a **cardiac catheterization laboratory experience on live animals**. Attendees will be able to perform interventional procedures in swine under the guidance of world class faculty.

The main scientific program of CSI America will provide an update on the latest trials, studies, new devices, techniques and hot topics in the field. The **hands-on sessions** will complement

this program by providing valuable practical experience and step by step guidance through case-based discussions, simulation and demonstration of devices.

Our ever popular **cathlab café** sessions will give attendees and faculty the chance to share and discuss their most interesting cases in an informal setting.

We are passionate about improving the lives of patients with cardiovascular disease by creating platforms for exchanging knowledge both in-person and virtually.

**We look forward to welcoming you to Orlando!**

*Zahid Amin, Sir Shakeel A. Qureshi, Horst Sievert  
(On behalf of the board of directors)*

### Board of directors

**Zahid Amin, MD**, Orlando, USA  
**Lee Benson, MD**, Toronto, Canada  
**Stefan Bertog, MD**, Minneapolis, USA  
**Allison Cabalka, MD**, Rochester, USA  
**John Carroll, MD**, Denver, USA

**Issam D. Moussa, MD**, Champaign, USA  
**Sir Shakeel A. Qureshi, MD**, London, UK  
**Juan P. Sandoval, MD**, Mexico City, Mexico  
**Horst Sievert, MD**, Frankfurt, Germany  
**John Thomson, MD**, Baltimore, USA

### Who should attend

CSI is designed for adult and pediatric interventional cardiologists, cardiothoracic surgeons, anesthesiologists, imaging specialists, nurses, technicians and any other medical specialty involved in catheter interventions for congenital, structural and valvular heart disease and heart failure.

CSI congresses also provide opportunities for engineers, device design specialists and inventors to learn from and network with physicians.

### CSI Foundation event

CSI America is supported by CSI Foundation, a not-for-profit organisation that has been formed to aid the development of congenital, structural and valvular heart interventions worldwide.
